BLACKJACK

To complete missions, and of course make sure you get paid, you'll need effective firepower. Luckily, there's a man more than willing to give you everything you want – at a price, of course. Blackjack is an underground weapons dealer who somehow manages to get his hands on the latest equipment – probably through shady links in arms companies and across the black market. You can contact Blackjack in between missions or – if you can find his secret armouries – while out on the battlefield, to buy weapons, stock up on ammo, recharge your equipped VAN-Guard system, and equip previously purchased weapons and equipment.
